

Gustavo Colina

Aragua, Cagua - Venezuela | +58-424-3737586 | gustavojose0819@gmail.com | github.com/Suggus1899

Professional Profile

Informatics Engineering student specialized in Full-Stack development, focused on process automation and document workflow digitization. I have built web and desktop systems for industrial and remote environments that reduce operating time and the margin for human error. Strong in database design and modeling, clean architectures (Clean Architecture, SOLID), and results-oriented software delivery, with hands-on experience across the complete development cycle: from requirements gathering to production deployment.

Professional Experience

Full-Stack Developer - Remote

KeolT - Peru | March 2026 - July 2026

- Developed a cross-platform Flutter/Dart client for Android, iOS, and desktop.
- Implemented Clean Architecture with Provider for session management and role-based access.
- Integrated interactive Rive vector animations and Glassmorphism design.
- Developed the system web layer with Next.js as part of the full-stack solution.
- Managed reactive state through a decoupled architecture designed for scalability.

Full-Stack Developer (Professional Internship)

Industrias de Alimentos El Trebol | February 2026 - August 2026

- LogMaster - Access Control and Visitor Management System.
- Gathered requirements and analyzed operations to understand business logic.
- Designed a PostgreSQL database with AES-256-GCM encryption for sensitive PII.
- Designed and developed a Turborepo monorepo: Express/TypeScript backend with Sequelize and multiple Next.js apps for administration, auditing, and reception kiosk.
- Automated management processes with complete digital visitor and access records.
- Integrated PDF and Excel reporting for operational evidence and audits.
- Reduced process execution time from up to 10 minutes to under 1 minute.
- Implemented differentiated Administrator, Guard, and Auditor roles.

Technical Skills

Programming Languages	JavaScript, TypeScript, Go, Python, Rust, Java, Dart, C++
Frontend	React, Next.js, Vue.js, Angular, Tailwind CSS, Vite, Framer Motion, shadcn/ui, React Flow, Zustand, Leaflet
Backend	Node.js, Express, NestJS, Spring Boot, Spring Security, Hibernate/JPA, Actix-web
ORM & Databases	Prisma, Sequelize, MongoDB, PostgreSQL, MySQL, SQLite, Redis / BullMQ
DevOps & Cloud	Docker, GitHub Actions, Nginx, MinIO, AWS, Vercel
Systems & Mobile	Flutter / Dart, Kotlin Multiplatform, TensorFlow (face-api.js), Socket.io
Tools	Git, GitHub, Swagger / OpenAPI, Postman, ESLint, Jest

Education

Informatics Engineering - Systems Engineering Specialization
Universidad Nacional Experimental Romulo Gallegos (UNERG) - Aragua, Venezuela

Certifications

Data Science, Prompt Engineering, SQL (Introduction & Intermediate) - DataCamp
Java Fundamentals, Java OOP, Spring Boot - TodoCode

Selected Projects

Project	Key technologies	Description
Chiguire	Go (chi), Next.js, Flutter, PostgreSQL	Offline-first multi-tenant ERP with PowerSync synchronization
E-commerce Platform	Go (chi, sqlc), Next.js, PostgreSQL	Store and admin panel; Go monolith replacing 5 Spring Boot microservices
Habitas	Express, Sequelize, React/Vite, PostgreSQL	Residential platform with biometric KYC and P2P transactions
Hermit	Rust, FUSE, cgroups/namespaces	Linux container runtime (educational systems project)
Meden	Go (Gin), Flutter (GetX), PostgreSQL	Fiscal, commercial, and operations management for Mexico with SAT integration
Myvibesfit	Go (chi), Flutter (Riverpod), PostgreSQL	Multi-tenant gym training app with progression engine and gamification
Ohana	Express, Sequelize, React/Vite, Flutter	Rental platform with biometric KYC, live chat, and mobile app
Souvenirs	NestJS, Prisma, Next.js, Expo	Multi-tenant SaaS for photographer bookings, invoices, and payments
TrickReport	Go (chi), Astro 5, PostgreSQL, WebSockets	IT ticketing system aligned with ITIL v4 and ISO/IEC 20000-1
LogMaster	Express, Sequelize, Next.js, Turborepo	Encrypted (AES-256-GCM) access control and visitor management platform
Libertarian Forum	Next.js, Drizzle, Tiptap	Bilingual CMS with an article editor for a think tank
ZadintsPage	React 19, Vite, Tailwind CSS	Marketing website and dashboard for development services
